

How to Connect to Zoom Meetings

Mac

Sunshine Community Health Center is offering Telemedicine services through Zoom. You will be provided with an individual Meeting ID number that will connect you with your Sunshine Provider. If you have multiple appointments, you will be provided with a new Meeting ID for each appointment. Please make sure to join each meeting early, and use the new Meeting ID for each appointment.

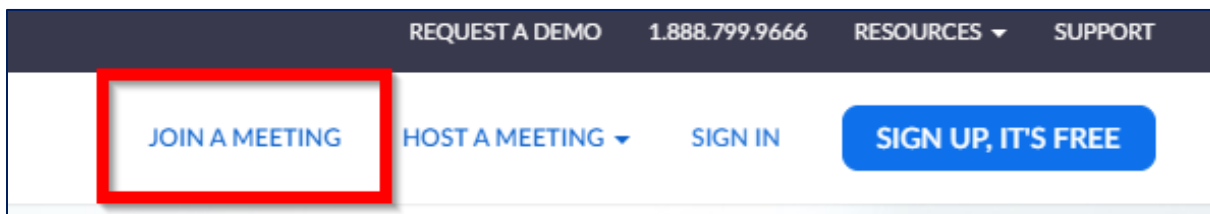

This guide will walk you through the steps to connect to a Zoom meeting using a Mac desktop or Macbook. You will need to have a few items to make this work

You will need a reliable internet connection. If you can stream Netflix or YouTube videos, Zoom should work well for you.

You will also need a webcam with a microphone and speakers. If you have a MacBook with a built in webcam, it will have built in microphone and speakers. If you have a Mac that doesn't not have a built in webcam, you will need to have external speakers as well as a webcam with a built in microphone.

How to connect to your Zoom meeting:

First open the Safari web browser and go to the website zoom.us. In the top right corner of this page click on “Join a Meeting.”

Now find your Meeting ID that was provided to you and type it into the blank space. Click Join.

How to Connect to Zoom Meetings

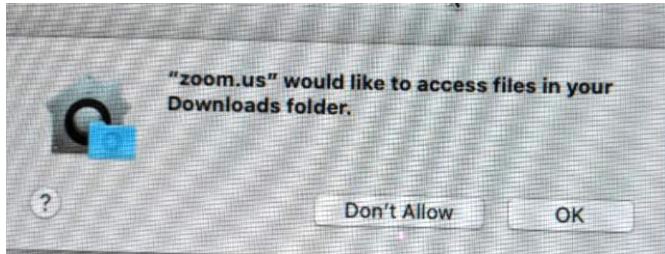

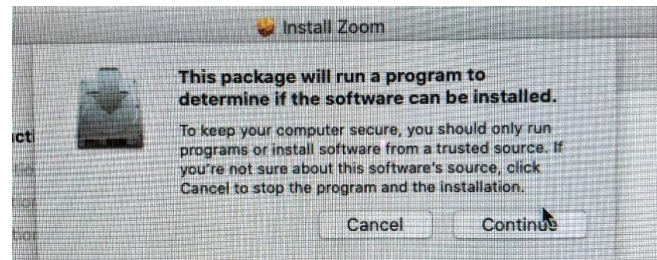

Mac

Your download will now start. Once the download starts, click the download button, and the double click on the Zoom.pkg file.

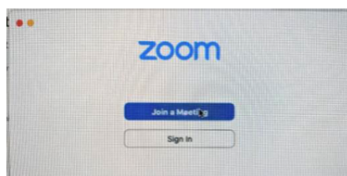

You may be asked if you want to run a program to determine if the software can be installed. If you see this click Continue.

You will see a prompt to allow Zoom to access files in your Downloads. Click OK.

The Zoom software will now be installed. It should automatically run, but if it doesn't, go to your launcher and open the Zoom software.

(If you have been in a zoom meeting with us before: Please open the Zoom software from your Launcher and then continue with the instructions from here.)

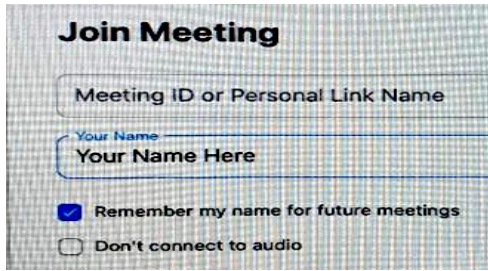

On the Main window, click Join a Meeting.

How to Connect to Zoom Meetings

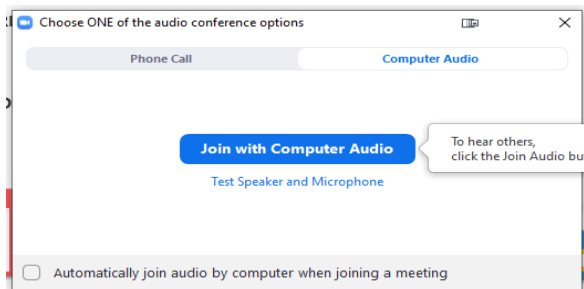

Mac

Now enter your Meeting ID again, and then Type your name into the "Your Name" field. Click on the blue "Join" button.

You will be asked to enter a password. Please enter the password that was provided with your Meeting ID.

You might be prompted to allow access to the microphone. Click OK. Now Zoom will ask how you want to connect to Audio. Click on "Join With Computer Audio."

You are now in the Zoom meeting.

If you joined early, you will be the only person in the meeting. This is OK. Please just wait in the meeting until your provider connects to you. You do not need to close the meeting and reopen it or do anything like that. That will only cause more problems. Once your provider connects, you will be able to see and hear them through your screen.

If you need to join another meeting another day or time, you will not need to perform all of the above steps. You will be able to run the Zoom software that is installed on your Mac and the join the meeting like above. Please follow the directions from the indicated spot.
